Nosepads made of PVC are still very popular. F&W is offering more than 50 standard versions. You can choose among different mounting systems, sizes from 9 mm up to 19 mm and several pad shapes: symmetrical, uniglobal, square-shaped, trapezoid, round, triangular, drop-shaped.

To keep up with the design changes in fashion, ***we are now also offering a modern rectangular shape!***

Like for all F&W PVC pads we are using a non-allergenic phthalate-free PVC material. In addition to the neutral version, the rectangular insert can be personalized by an individual logo printing.

**100% Made in Germany in our own facilities
and with tested materials only**

Body: Semi-soft, clear Esprit® material (modified PVC)

Inlay: Clear polycarbonate

Logo/brand: Different types of logo printings available on request
